

# COURSE GUIDE 2026

## AI + INFORMATION TECHNOLOGY

Route to the IT World

## ■ DESCRIPTION

The AI + Information Technology course at ATN Campus is designed to provide students and professionals with essential IT knowledge combined with the power of artificial intelligence. The program covers key areas such as AI applications, cloud computing, data management, automation, cybersecurity basics, and modern IT systems. Students gain hands-on experience using industry-relevant tools and technologies while learning how AI can improve system efficiency, support data-driven decisions, and enhance IT operations. By combining theoretical learning with practical training, this course helps participants develop future-ready technical skills and strengthen their career opportunities in today's fast-growing digital and technology-driven world.

## ■ WHAT ARE THE BENEFITS IN STUDYING AI + INFORMATION TECHNOLOGY AT ATN?

### 1. Future-Ready Technology Skills

Students learn modern technologies such as artificial intelligence, cloud computing, automation, and data management. These skills are highly demanded in today's digital economy and prepare students for emerging technology trends.

### 2. Hands-On Practical Training

The program focuses on practical learning, allowing students to work with real tools, platforms, and projects. This helps learners understand how AI and IT solutions are applied in real business and industry environments.

### 3. Strong Career Opportunities

AI and IT knowledge opens doors to multiple career paths such as AI specialist, data analyst, IT support engineer, software developer, and technology consultant in both local and global markets.

# WHAT ARE THE BENEFITS IN STUDYING AI + INFORMATION TECHNOLOGY AT ATN?

## 4. Improved Problem-Solving and Analytical Skills

By studying AI algorithms, data analysis, and system design, students develop strong logical thinking and problem-solving abilities that are essential for building innovative technology solutions.

## 5. Industry-Relevant Knowledge and Tools

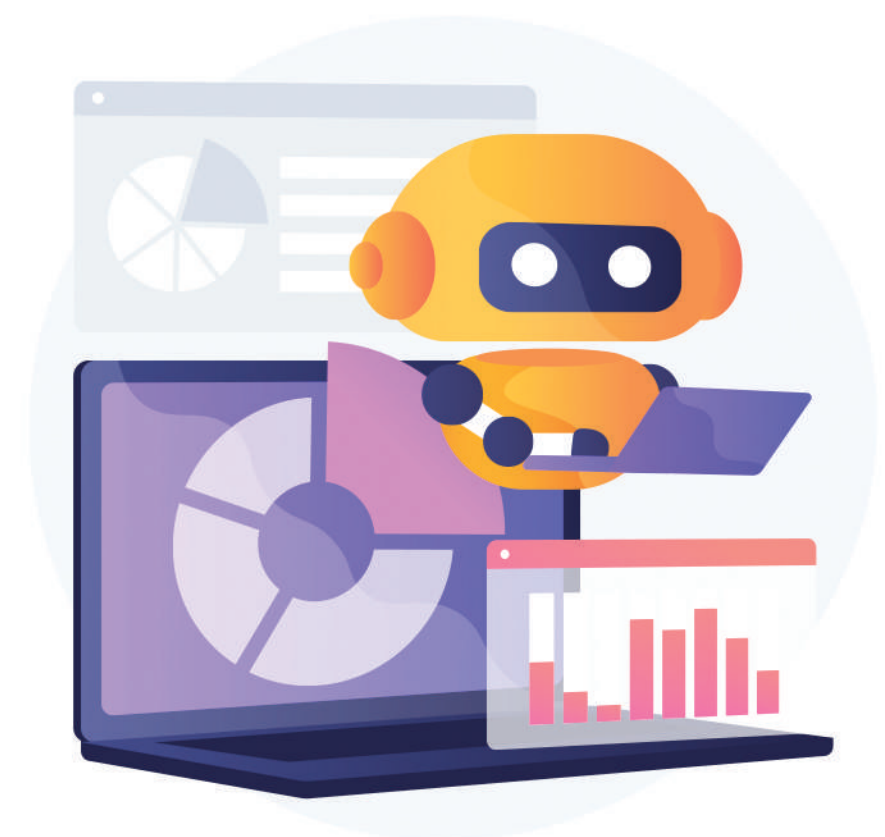

Students gain experience with industry-standard software, platforms, and technologies used by modern companies, helping them stay competitive and job-ready after completing the course.

## 6. Ability to Build Smart and Automated Solutions

AI knowledge allows students to create intelligent systems, automate processes, and develop smart applications that improve efficiency in industries such as business, healthcare, finance, and marketing.

## 7. Better Career Growth and Global Opportunities

Professionals with AI and IT expertise are highly valued worldwide. These skills can lead to higher salaries, international career opportunities, and the ability to work in rapidly growing technology sectors.

## COURSE DETAILS

Course Name	AI + Information Technology
Duration	03 Months
Class	Two Day Class Per Week / 4 Hours
Language	English
Certificate	ATN CERTs
Class Mode	Online / In-Person
Practical Training	Yes Available

## COURSE CERTIFICATE

### ATN CERTs+

The ATN CERTs Certificate is awarded to students who successfully complete approved short-term, diploma, professional, or preparatory programs at ATN Campus, in line with its academic structure and assessment standards. The certificate confirms that recipients have gained the necessary theoretical knowledge, practical skills, and academic competencies relevant to their chosen field of study. It serves as formal recognition of academic achievement and is intended to support students' career development, professional growth, and opportunities for further education both locally and internationally.

## ■ PREREQUISITES

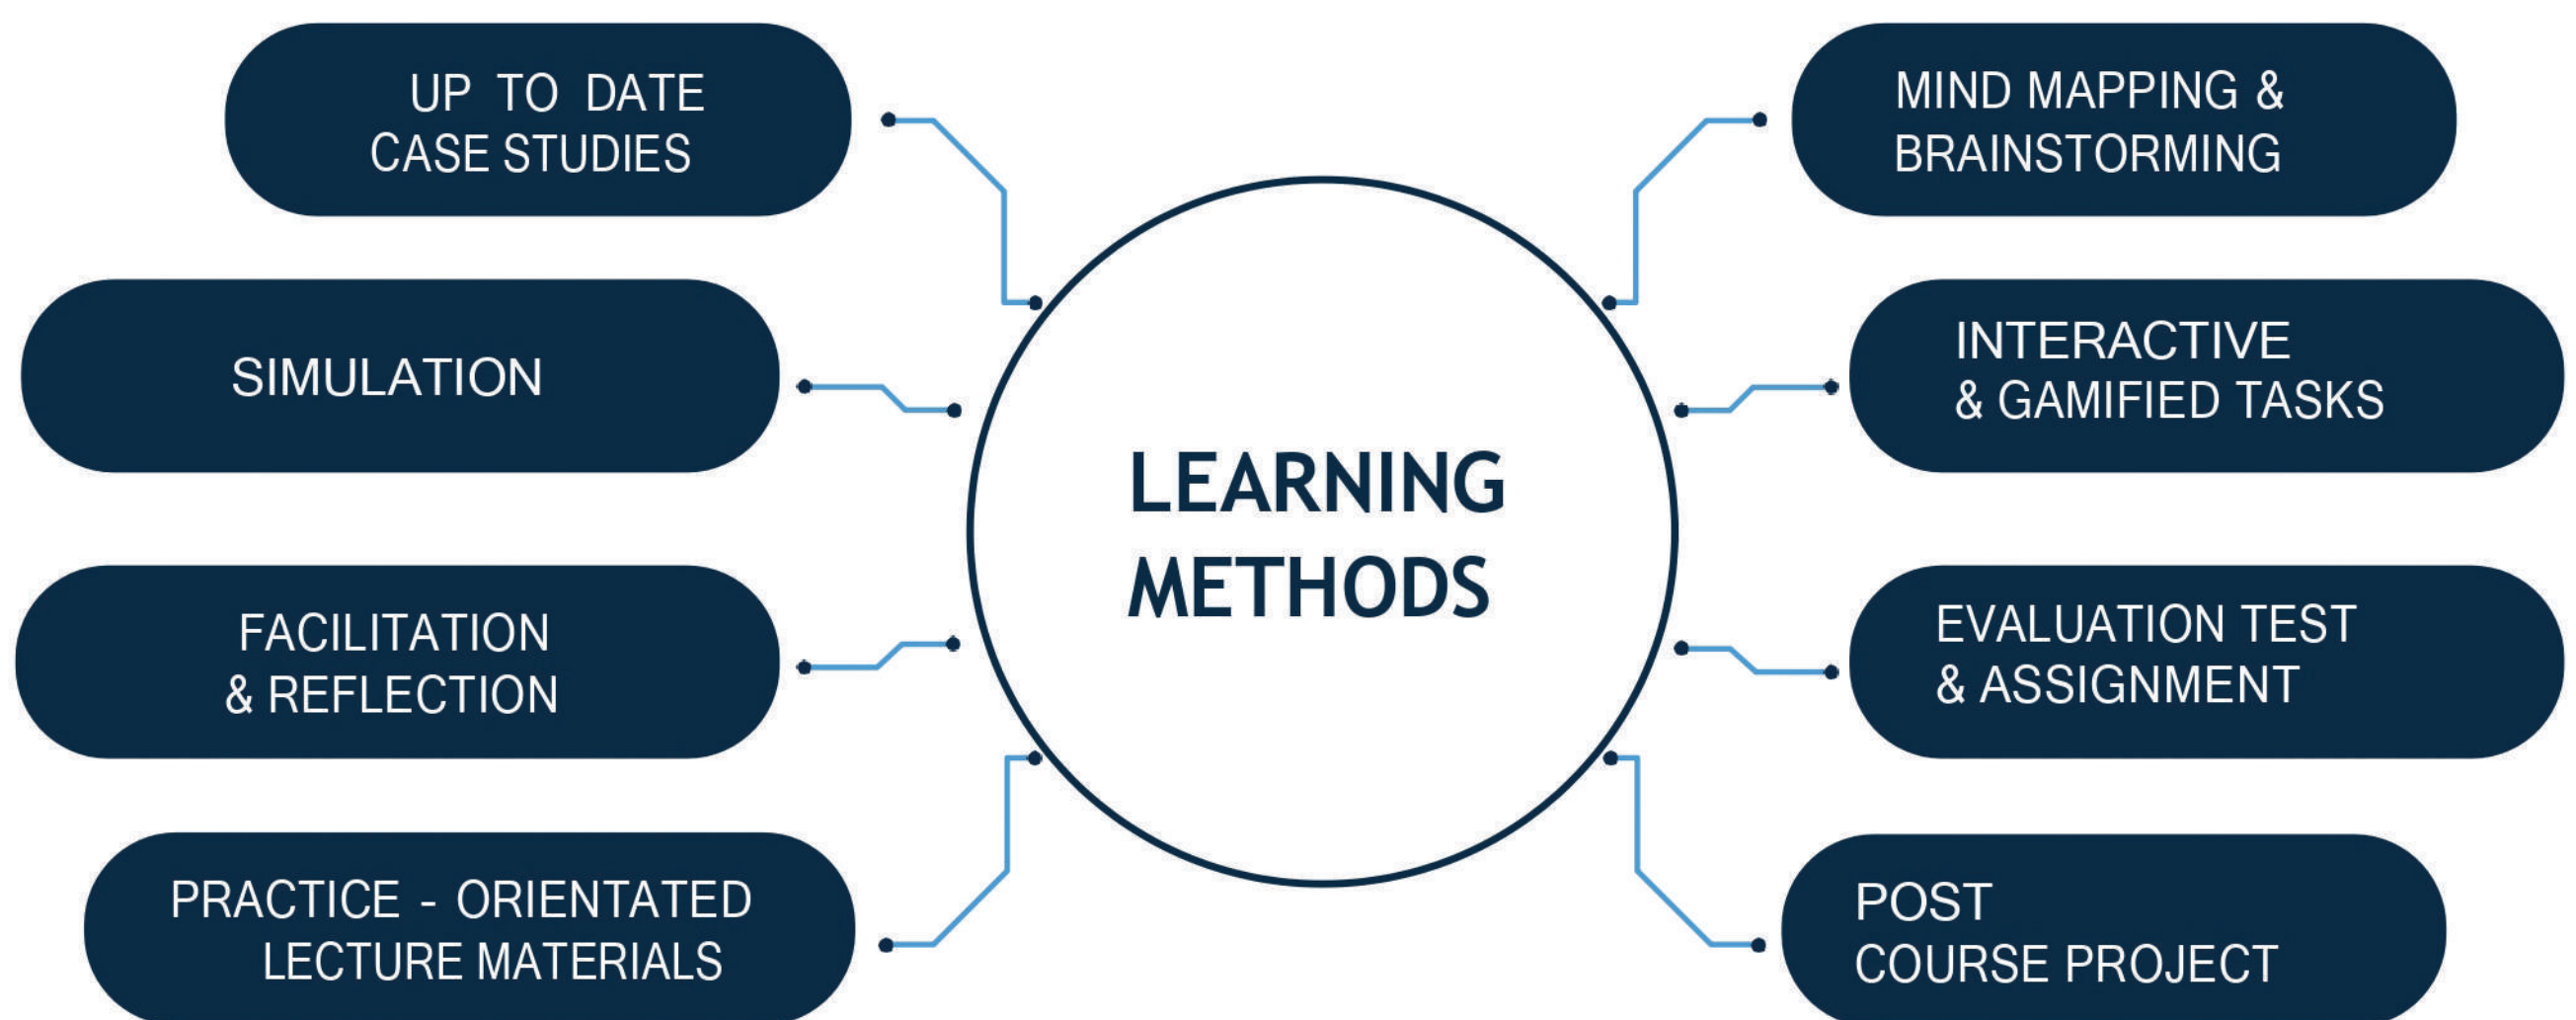

This program does not require any prior programming knowledge. Students are expected to have basic computer literacy, including the ability to use a computer, operate a keyboard and mouse, and understand basic file handling. A basic understanding of English is recommended, as programming instructions and syntax are in English.

## ■ WHO CAN ATTEND

This program is suitable for school students, undergraduates, and beginners who want to learn AI + Information Technology. It is ideal for students in IT, computing, engineering, or technology-related fields, as well as non-technical learners interested in AI, automation, and modern IT systems. Working professionals, entrepreneurs, and career changers who want to build practical AI and IT skills for career growth can also enroll in this program.

## ■ LEARNING METHODOLOGIES

All our courses include the most effective adult learning methodology and techniques. Our experience shows that only a combination of these methods can guarantee the best learning outcomes for attendees.

VENUE - ATN CAMPUS Colombo / Kurunegala / batticaloa

**ADDRESS : 507, GALLE ROAD, COLOMBO 06**

## ■ COURSE MODULES

### Module 1: Introduction to Information Technology

- Understanding the IT Industry
- Importance of IT in modern businesses
- Career opportunities in Information Technology

### Module 2: Computer Fundamentals

- Understanding computer hardware and software
- Input and output devices
- Storage devices and system components

### Module 3: Operating Systems

- Introduction to operating systems
- File and folder management
- System configuration basics

### Module 4: Internet and Digital Skills

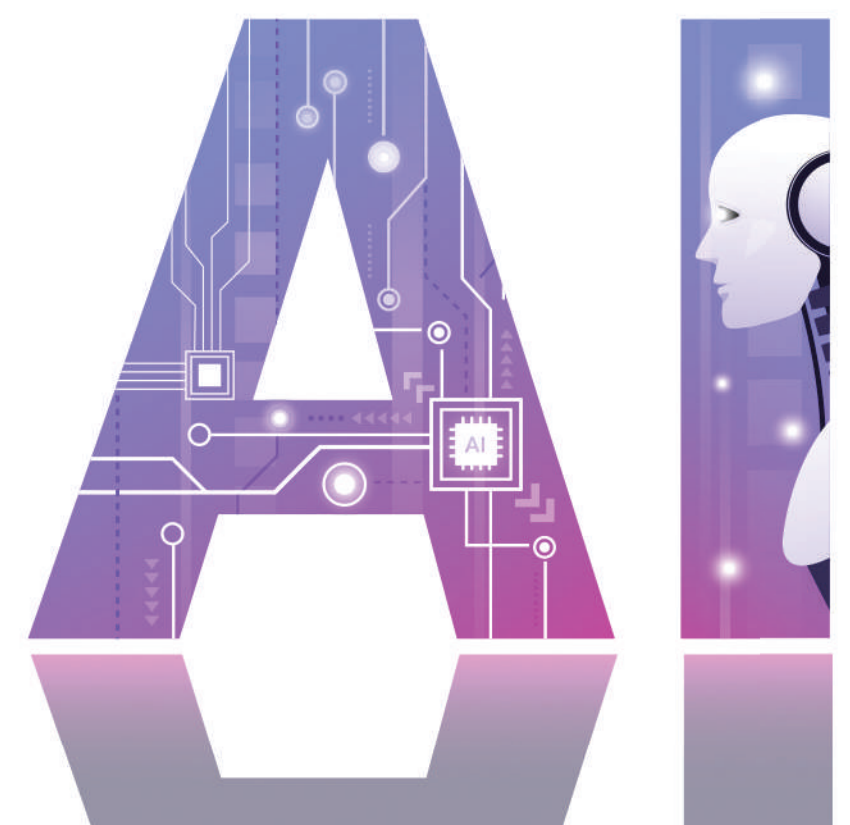

- Understanding internet technologies
- Safe internet practices
- Email communication and online collaboration tools

### Module 5: Office Productivity Tools

- Microsoft Word basics
- Microsoft Excel basics
- Microsoft PowerPoint fundamentals
- Digital documentation skills

### Module 6: Basic Troubleshooting

- Identifying common computer issues
- Basic system maintenance
- Introduction to system updates and security

## ■ COURSE MODULES

### Module 7: Introduction to Artificial Intelligence

- What is Artificial Intelligence
- History and evolution of AI
- Real-world applications of AI

### Module 8: AI in Everyday Life

- AI in smartphones and smart devices
- AI in healthcare, finance, and transportation
- AI in business and automation

### Module 9: Introduction to Machine Learning

- Basic concepts of machine learning
- Understanding how machines learn from data
- Examples of machine learning applications

### Module 10: AI Tools for Students

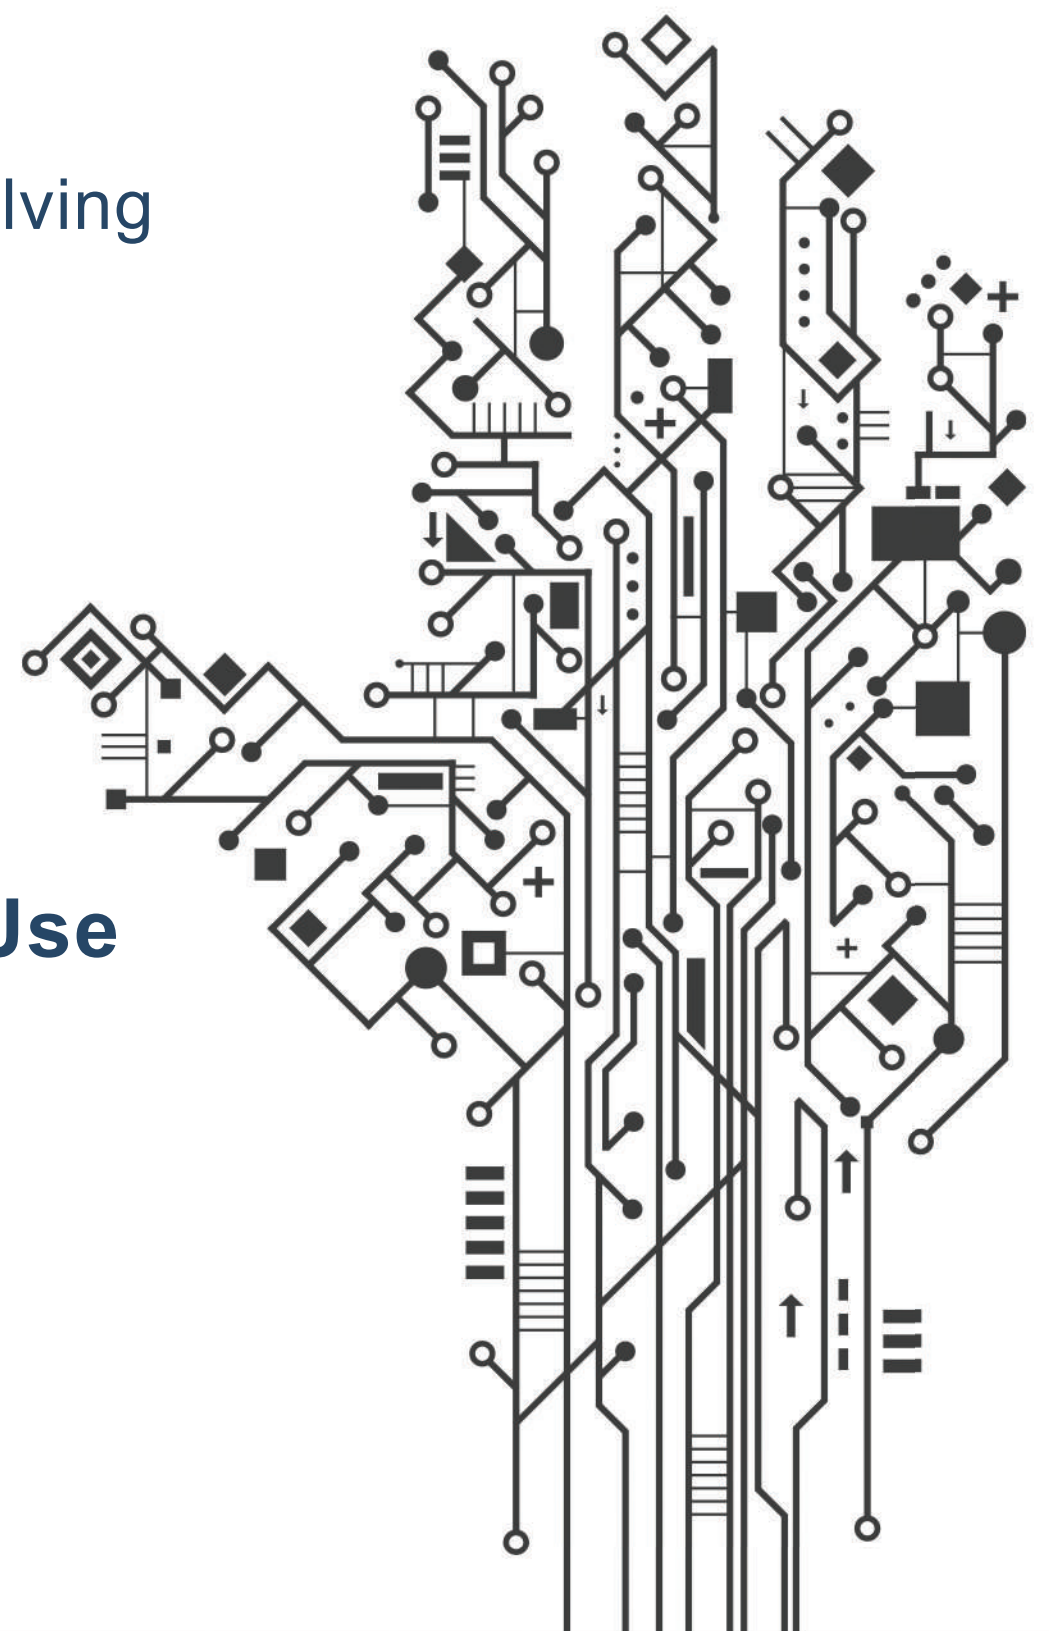

- Introduction to AI productivity tools
- Using AI tools for research and learning
- AI tools for content creation and problem solving

### Module 11: Prompt Engineering Basics

- Understanding prompts
- Writing effective prompts for AI tools
- Practical exercises with AI assistants

### Module 12: AI Ethics and Responsible Use

- Ethical use of AI technologies
- Understanding limitations of AI
- Responsible use of AI tools
